

Ferrari 296 , 2024

Ferrari 296 GTB F1 DCT - 12/2024

General Overview:

The 2024 Ferrari 296 GTB marks a revolutionary chapter in Ferrari's mid-engine history, introducing plug-in hybrid technology while preserving the brand's signature driving excitement. Finished in the elegant **Bianco Avus** color, this model combines bold aesthetics with technological innovation. The inclusion of ventilated, fully electric seats adds a layer of luxury and comfort, making the 296 GTB as refined as it is powerful.

Performance and Handling:

The heart of the 296 GTB is a cutting-edge powertrain that blends a **3.0-liter** twin-turbocharged V6 engine with an electric motor, together producing a system total of **663 horsepower**. Power is sent to the rear wheels through an 8-speed F1 dual-clutch transmission, enabling the car to accelerate from 0 to 100 km/h in just 2.9 seconds and reach a top speed exceeding 330 km/h. The hybrid system not only boosts performance but also offers an electric-only driving mode for short-range urban travel.

Interior and Features:

Inside, the cabin reflects Ferrari's philosophy of pure driver engagement blended with modern luxury. The ventilated, fully electric seats offer precise adjustability and support for spirited drives or long tours. The driver-focused layout includes a digital instrument cluster and a sleek infotainment interface, both operated via tactile steering wheel controls. The minimalist yet high-tech ambiance is enhanced by exquisite materials and impeccable attention to detail.

Exterior Design:

With flowing lines and sculpted aerodynamics, the 296 GTB redefines the modern Ferrari silhouette. The **Bianco Avus** finish emphasizes its curvaceous profile and functional beauty. Key elements include an active rear spoiler, F1-inspired LED headlights, and flush-mounted door handles. The car's proportions highlight its low center of gravity and performance-focused architecture.

Safety and Assistance Systems:

The 296 GTB is equipped with advanced driver assistance features including adaptive cruise control, lane departure warning, front and rear parking sensors, and a rearview camera. Multiple airbags, stability control, and advanced traction management ensure that performance never compromises safety. Whether on a racetrack or urban streets,

the 296 GTB provides a confident, connected experience behind the wheel.
