

Lamborghini Urus , 2024

Lamborghini Urus S 4WD - 03/2024

Exterior:

The **Lamborghini Urus S** impresses with its aggressive yet elegant design, featuring sharp aerodynamic lines and Lamborghini's signature styling cues. The front is dominated by sleek **LED headlights**, bold air intakes, and a powerful stance enhanced by **aluminum alloy wheels**. A **Sunroof/Glass Roof** brings additional light into the cabin, while details like roof rails, fully painted lower bodywork, and a rear **full aero kit** underline the car's dynamic nature. The Urus S remains a true SUV with supercar presence.

Performance and Efficiency:

This Urus S is equipped with a **supercharged V8 engine**, paired with Lamborghini's advanced **4WD system** and adaptive **air suspension**, ensuring exceptional performance on both roads and rough terrain. The **skid prevention device**, obstacle sensors, and an all-around camera system provide both sportiness and confidence in every driving situation.

Interior and Features:

Inside, the Urus S offers a luxurious and sporty cabin with high-quality **leather seats**, including **heated** and **electric adjustments** for superior comfort. The interior also features a **keyless entry**, **power windows**, and **seat air conditioning**, making every journey as enjoyable as possible. The fully flat rear seating area and thoughtful details ensure both versatility and sophistication.

Comfort and Technology:

This specification includes **adaptive cruise control**, **double air conditioning**, a **memory-based navigation system**, and a **music player connection** (likely supporting Apple CarPlay and Android Auto). Additional highlights include — obstacle detection, and anti-theft devices for peace of mind. The **air suspension** allows for a smooth, adaptable ride regardless of conditions.

Safety and Assistance:

Comprehensive safety features include **ABS**, **airbags for driver, passenger, and side**, **all-around camera**, **blind-spot monitoring**, and **collision mitigation systems**. Skid prevention, idling stop, and automatic high beams contribute to safety and efficiency in daily driving.
