Lamborghini Huracan , 2022

Lamborghini Huracán STO (LDF) – 05/2022

General Overview:
The 2022 Lamborghini Huracán STO is the embodiment of track spirit brought to the public road. Finished in the exclusive **Blu Nethuns** (metallic blue) paint, this supercar merges extreme aerodynamics, lightweight engineering, and raw driving emotion. The STO (Super Trofeo Omologata) draws inspiration directly from Lamborghini's Super Trofeo and GT3 racing machines.

Performance and Handling:
At the heart of the Huracán STO lies a naturally aspirated **5.2-liter V10 engine** producing **640 horsepower** and **565 Nm** of torque. Power is sent exclusively to the rear wheels via a 7-speed Lamborghini Doppia Frizione (LDF) dual-clutch transmission. It sprints from 0 to 100 km/h in just 3.0 seconds, with a top speed of 310 km/h. Precision handling is enhanced through torque vectoring and a new rear-wheel steering system, delivering sharp agility even in the tightest corners. The front lift system (Front Lifter) eases navigation over speed bumps and inclines in everyday driving.

Interior and Features:
Inside, the Huracán STO is purpose-built for lightness and functionality. Carbon fiber (CFRP) dominates the cabin, from the racing bucket seats to the door panels and even the floor mats. Upholstery is finished in Alcantara and exposed carbon fiber. The central display offers telemetry, vehicle status, and multimedia controls. Drivers can switch between unique drive modes — STO, Trofeo, and Pioggia — tailored for different road and weather conditions.

Safety and Technology:
The Huracán STO is equipped with essential safety systems including ABS, stability control, traction control, and airbags. A rearview camera and parking sensors aid in daily maneuvering, while onboard telemetry allows detailed performance tracking during track sessions.

Exterior:
The exterior is engineered with a focus on aerodynamic efficiency: the integrated "Cofango" hood, adjustable rear wing, and large rear diffuser optimize downforce and stability. The **Blu Nethuns** color highlights every sculpted surface and aerodynamic detail. Lightweight 20-inch magnesium wheels and massive carbon-ceramic brakes

complete the race-inspired appearance of the Huracán STO.

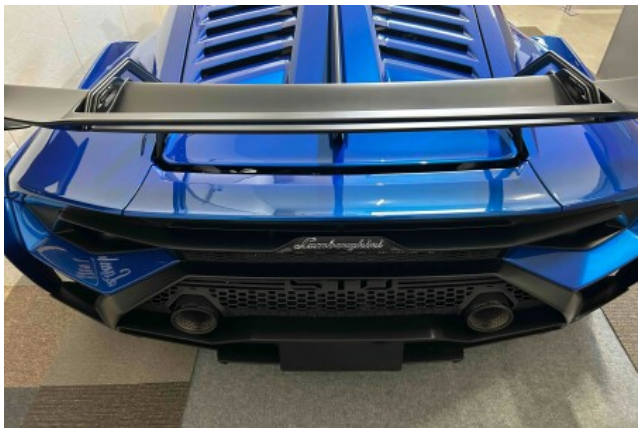

Specifications:

ID: SNT-705
Final Price: 365000.00 EUR
Interior Color: Black
Number of Seats: 2
Steering Side: Right
Condition: New
