

Lotus Emira , 2024

Lotus Emira 2.0 AMT First Edition - 07/2024

General Overview:

The 2024 Lotus Emira 2.0 AMT First Edition is a precision-engineered British sports car that masterfully combines thrilling performance, premium craftsmanship, and daily drivability. Finished in elegant Osmium Silver with 20-inch ultra-lightweight V-spoke forged alloy wheels and signature First Edition badging, the Emira strikes a bold profile. Design elements such as the titanium exhaust finisher, branded brake calipers, and Lotus Design Pack give it a uniquely athletic and refined identity.

Performance and Handling:

Under the hood, the Emira is powered by a **2.0-liter** turbocharged engine producing **365 horsepower**, paired with an Automated Manual Transmission (AMT) for a responsive and engaging driving experience. With Lotus Drivers Pack and hydraulic power-assisted steering, the Emira delivers finely tuned handling and road feedback. Selectable drive modes and artificial exhaust sound within the cabin elevate the emotional connection to the drive, whether you're cruising through the city or attacking corners.

Interior and Features:

Inside, the Emira focuses on both performance and comfort. A **12.3-inch digital TFT instrument cluster** and 10.25-inch central touchscreen provide access to navigation, performance data, and multimedia functions. The KEF premium audio system delivers high-fidelity sound through 10 channels at 340 watts, supported by wireless Apple CarPlay and Android Auto. Comfort features include 12-way electrically adjustable seats with memory, heated seats, single-zone climate control, keyless start, and ambient lighting. Satin chrome trim and leather accents further emphasize the car's bespoke feel.

Technology and Driver Assistance:

Equipped with cruise control, rear parking sensors, TPMS (Tire Pressure Monitoring System), and voice control, the Emira offers daily usability without sacrificing its pure driving character. USB ports, satellite navigation, and a 12V socket round out its practical features.

Safety and Structure:

Safety is assured with systems like ABS, Electronic Brake Assistance (EBA), front airbags for both driver and passenger, and an electric parking brake. The Emira's

lightweight bonded aluminum chassis ensures exceptional agility and strength, staying true to Lotus' "light is right" philosophy.
