

Mazda Mazda 2 , 2023

Mazda 2 1.5 15S 4WD - 2023

General Overview

The **Mazda 2 1.5 15S 4WD (2023)** brings together agility, practicality, and all-weather capability in one refined compact hatchback. Built in Japan, this model combines elegant design with Mazda's signature driving dynamics and advanced technology. Its efficient 1.5-liter petrol engine, lightweight construction, and intelligent all-wheel-drive system make it equally suited for city life and winding country roads.

Performance and Efficiency

Under the hood, the **P5-VPS 1.5L inline-four petrol engine** produces **110 horsepower** and **142 Nm of torque**, paired with a **6-speed automatic transmission**. The car uses Mazda's **i-ACTIV AWD system**, which features an **Active Torque Control Coupling** on the rear axle. This means it operates primarily in front-wheel drive, automatically transferring torque to the rear wheels when slip, acceleration, or low traction is detected — offering optimal grip without sacrificing fuel efficiency. Combined fuel consumption averages just **5.5 L/100 km**, making it one of the most economical AWD hatchbacks in its class.

Interior and Comfort

Inside, the Mazda 2 maintains a premium feel with **fabric upholstery, telescopic and tilt-adjustable steering**, and a **smart, driver-focused cockpit**. The interior offers comfort and convenience through **keyless start, air conditioning, electric windows, height-adjustable driver's seat**, and an **8-inch color display** supporting **Apple CarPlay** and **Android Auto**. Despite its compact dimensions, the car provides generous interior space for five passengers and a practical layout for daily use.

Technology and Safety

Safety and control are at the heart of the Mazda 2's design. Equipped with **ABS, EBD, ESP, TCS**, and **Hill Start Assist**, it ensures stability in all conditions. Advanced driver aids include **Lane Keep Assist, Blind Spot Monitoring, Automatic Emergency Braking, High Beam Assist, Rear Parking Sensors**, and a **rear-view camera**. The i-ACTIV AWD system works seamlessly with these features to provide confident handling on slippery or uneven roads.
