Nissan Serena , 2025

Nissan Serena 2.0 XV – 01/2025

General Overview:
The **Nissan Serena 2.0 XV** is a spacious and family-friendly minivan that blends practicality, comfort, and technology in a sleek and modern package. Finished in a refined **Diamond Black**, this 2025 model is registered but **unused**, offering a like-new experience with full factory features. With its clean lines and premium touches, it’s ideal for both family use and business transport.

Powertrain and Efficiency:
Under the hood, the Serena XV is powered by a **2.0-liter petrol engine** with Nissan’s **S-Hybrid** mild hybrid system, which adds an electric motor to support fuel efficiency and smoother driving. The mild hybrid assists during acceleration and helps reduce fuel consumption without requiring external charging. The powertrain is paired with an Xtronic CVT, delivering smooth and quiet operation ideal for city and long-distance driving.

Interior and Features:
Inside, the Serena offers a spacious and flexible cabin designed for comfort and usability. It includes **dual electric sliding doors** for convenient entry and exit from both sides — perfect for tight parking spaces. The **smart key system** adds hands-free access and start functionality, enhancing everyday convenience. The seating configuration allows for multiple layout options, accommodating both passengers and cargo with ease.

Comfort and Technology:
Equipped with advanced features such as automatic climate control, a touchscreen infotainment system (depending on the market), and multiple USB charging ports, the Serena ensures comfort for all occupants. Large windows, generous legroom, and thoughtful interior storage make long journeys relaxing and organized.

Exterior Design:
In **Diamond Black**, the Serena stands out with a refined and polished appearance. The bold front grille, LED lighting, and practical sliding doors reflect the perfect balance between form and function. Its streamlined profile reduces wind noise and improves efficiency while maintaining a strong road presence.

Safety:
The Serena XV is equipped with standard Nissan Intelligent Mobility features, including automatic emergency braking, lane departure warning, and adaptive cruise control (in higher trims or as options), ensuring safety and driver support during every trip.

Specifications:

ID: IWL-938
Final Price: 29500.00 EUR
