

Nissan Note , 2020

Nissan Note e-Power B - 10/2020

General Overview

The **Nissan Note e-Power B (2020)** represents one of Nissan's most innovative compact hybrids, combining the efficiency of electric drive with the practicality of a petrol-powered generator. Designed with everyday comfort and technology in mind, this hatchback offers smooth, quiet operation and agile handling — ideal for city driving and short trips around the island.

Performance and Efficiency

Powered by Nissan's **e-Power hybrid system**, the Note uses a **1.2-liter petrol engine** to generate electricity for the electric motor, which directly drives the wheels. This setup delivers instant torque, excellent fuel efficiency, and the refined feel of a fully electric car without the need for external charging. The intelligent energy management system ensures seamless transitions between electric and engine-assisted modes for optimal performance.

Interior and Comfort

Inside, the cabin is spacious and functional, featuring comfortable seating for five passengers and a well-organized dashboard layout. The driving position offers excellent visibility, while the compact dimensions make parking and city navigation effortless. With its quiet powertrain and smooth acceleration, the Note e-Power provides a relaxed, enjoyable driving experience.

Ownership and Warranty

This vehicle is **already in Cyprus** and ready for immediate delivery. The price includes **all taxes, a full inspection at our service center, first service free of charge, warranty, registration under the first owner's name in Cyprus, and number plates.**
