Nissan Kicks , 2024

Nissan Kicks 1.2 e-POWER 4WD – 07/2024

Exterior:
The **2024 Nissan Kicks 1.2 e-POWER 4WD** combines urban-friendly proportions with a sporty, modern design. The bold V-Motion grille, sleek LED headlights with signature DRLs, and sculpted hood create a dynamic presence. Black cladding along the wheel arches, a floating roof design with contrasting colors, and stylish 17-inch alloy wheels emphasize its crossover character. The rear features sharp LED taillights connected by a gloss black panel and an integrated spoiler for a youthful, energetic look.

Performance and Efficiency:
This Kicks is powered by Nissan's innovative **e-POWER hybrid system**, combining a **1.2-liter 3-cylinder petrol engine** (acting solely as a generator) and an electric motor that drives the wheels. The system delivers around **136 hp (100 kW)** and responsive torque for smooth, quiet, and efficient driving. The **4WD version** uses an electric all-wheel-drive system that provides better traction on slippery roads, ensuring safety and stability. Fuel efficiency averages around **4.8–5.2 L/100 km**, making it highly economical for city and suburban driving.

Interior and Features:
Inside, the Kicks offers a well-appointed cabin with room for five passengers. High-quality materials, contrast stitching, and a floating center display create a stylish and comfortable environment. Standard features include a **7-inch digital instrument cluster**, an **8-inch touchscreen infotainment system** with **Apple CarPlay** and **Android Auto**, automatic climate control, keyless entry/start, and rear privacy glass. Rear seats fold in a 60/40 split to expand cargo space.

Technology and Safety:
Equipped with Nissan's advanced **Safety Shield 360**, the Kicks offers features such as adaptive cruise control, lane departure warning, blind spot monitoring, rear cross-traffic alert, automatic emergency braking with pedestrian detection, and a 360-degree Around View Monitor. Additional conveniences include a rearview camera, parking sensors, and hill-start assist, ensuring safety and ease of use in all conditions.

Specifications:

ID: UKG-117

Final Price: 24000.00 EUR
Interior Color: Brown
Number of Seats: 5
Steering Side: Right
Condition: New
