Overview

The Porsche Macan 96 kWh 04/2025 is a fully electric premium SUV that combines modern performance with everyday practicality. %READMORE% Equipped with a 96 kWh battery and 2WD system, it delivers smooth and responsive driving suited for both city use and longer journeys.

Driving Performance

Powered by an electric drivetrain paired with an automatic transmission, the Macan offers quiet acceleration and seamless power delivery. The low center of gravity enhances stability and overall driving balance.

Interior and Equipment

The cabin is configured for five passengers and features genuine leather power seats with heating function. Comfort and convenience are supported by automatic climate control, navigation system, and smart key access.

Technologies and Assistants

Safety systems include ABS, collision mitigation braking, airbags, and an all-around camera system. These technologies contribute to enhanced visibility and driver confidence.

Exterior

Finished in White, the Macan presents a clean and contemporary look. LED headlights and aluminum wheels complement the SUV's dynamic and refined styling.
